PARENTS — HAVE YOUR SONS OR DAUGHTERS HAD ONE OF THESE INJURIES?

- ◆ Brain Injury
- ◆ Stroke
- ◆ Spinal Cord Injury

Make a difference for the future – consider enrolling them in the confidential, voluntary Hawai'i Neurotrauma Registry.

Hawai'i Neurotrauma Registry

Holu lehua means “resilient” lehua.
Children with neurotrauma injuries
are resilient like the lehua.

Why have a Neurotrauma Registry?

We want to understand the needs of Hawai'i residents of all ages including youth and keiki experiencing brain injury or concussion, stroke, and/or spinal cord injury once they leave the hospital or care facility. This information will help us know what services are most required for our youth and keiki when they go home.

Join the Registry

With your consent, your children can join the registry online, by mail, or by making a phone or in-person appointment. All information collected is **CONFIDENTIAL**. It will not be shared with any schools, teachers, and coaches, or anyone else not part of the project.

To join the registry online, log on to:

www.HNTRsurvey.com

The Neurotrauma Registry Project Offers:

- The chance to provide valuable information that will help identify needed community supports, educate service providers and counselors, and develop safety and prevention plans and policies.
- Personalized information and referrals for youth and keiki with neurotrauma injuries.
